### **Exhibitor Rules & Regulations**

#### **Booth Construction**

All booth displays must be constructed so as to appear "finished" on all sides that may be visible, including from all adjoining booths. For example, if the framework structure of a pop-up booth is visible from an adjoining booth, that framework will need to be covered so as to not detract from the appearance of the adjoining booth. All exhibit displays should be designed and erected in a manner that will withstand normal contact or vibration caused by neighboring exhibitors, hall laborers or installation/dismantling equipment such as forklifts.

### **Line of Sight**

All exhibitors are entitled to a reasonable line of sight which varies by booth size and location. Generally, nothing should be over four feet (4') tall in the three feet (3') closest to the aisle. Regardless of the number of standard booths utilized, (e.g. 10'x20', 10'x30', 10'x40' etc.) display materials should be arranged in such a manner so as to not obstruct sight lines of neighboring exhibitors. The maximum height of eight feet (8') is allowed only in the rear of the booth space, with a four foot (4') height restriction imposed on all materials in the three feet closest to the aisle.

### **Standard Booth**

A standard booth consist of an area 10'x 10'x8' high. All display material over four feet (4') high, must be set back three feet (3') from the main aisle.

### **Endcap Booth**

An endcap booth is a 10'x20'x10' high booth exposed to aisles on three sides. The back wall is restricted to four feet (4') high within the three feet (3') closest to each aisle permitting adequate line of sight for the adjoining booths. The rest of the back wall can be no higher than ten feet (10'). Any portion of the back wall that extends beyond the eight foot (8') curtain must be finished (no exposed framing or structure) and may not carry any ad copy on the back side.

#### **Split Endcap Booth**

A Split Endcap is a 10'x20'x10' high booth exposed to aisles on three sides and shares a common back wall with another Endcap booth. In both cases, the entire cubic content of the booth may be used. Any portion of the back wall that extends beyond the eight foot (8') curtain must be finished (no exposed framing or structure) and may not carry any ad copy.

#### **Peninsula Booth**

Peninsula booths are any configuration of four or more booths exposed to aisles on three sides. Peninsula Booths are 20'x20'x16' high or larger. When a Peninsula booth backs up to two Standard Booths, the back wall is restricted to four feet (4') high within the three feet (3') closest to each aisle, in the back five feet (5') of the booth permitting adequate line of sight for the adjoining booths The rest of the back wall can be no higher than sixteen feet (16'). Any portion of the back wall that extends beyond the eight foot (8') curtain must be finished (no exposed framing or structure) and may not carry any ad copy on the back side.

### Island Booth/Split Island Booth

### Audio-Video/Music/Loud Demonstrations

Expo management reserves the right to limit or restrict sounds from any source that interfere with activities in neighboring exhibits. In general, sounds should be no louder than 85 decibels. As a matter of safety and courtesy to others, exhibitors should conduct sales presentations and product demonstrations in a manner which assures all exhibitor personnel and attendees are within the contracted exhibit space and not encroaching on the aisle or neighboring exhibits. It is the responsibility of each exhibitor to arrange displays, product presentation and demonstration area to ensure compliance. Special caution should be taken when demonstrating machinery or equipment that has moving parts or any product that is potentially dangerous. Exhibitors should establish a minimum setback of three feet (3') and/or install hazard barriers as necessary to prevent accidental injury to spectators. Demonstrations involving sound need to be limited in frequency and are at the discretion of show management. Generally, a neighbor across the aisle should not be able to hear your demonstration.

### **Hanging Signs and Graphics**

Whether suspended from above or supported from below, they should comply with all ordinary use-of-space requirements. The highest point of any sign in any booth should not exceed the maximum allowable height for that type of booth. Hanging signs and graphics should be set back a minimum of five feet (5') from adjacent booths and aisles. Multi-sided signs, projection screens or logos may not face an adjacent booth. This will include back walls, side panels, headers and towers.

#### **Floor Coverings**

All exposed floor area contained within the booth must be covered with carpet or other appropriate floor coverings.

SHIPPING ADDRESSES & RECEIVING DATES

### International Fuel Ethanol Workshop & Expo

CHI Health Center, August 24-26, 2020

Exhibitors may choose to ship freight to the advance warehouse or directly to show site. Valley Expo & Displays will receive and manage the freight at the warehouse and/or on show site as described in the following pages. Freight handling fees are paid to Valley Expo & Displays for these freight handling services, and are separate from and independent of freight transportation charges, which are paid to a freight carrier such as YRC, ABF, FedEx or any other carrier of the exhibitor's choosing. Exhibitors are responsible for securing a carrier of their choosing and arranging freight transportation to and from the event, and all associated transportation fees.

All inbound shipments must have a bill of Lading and/or certified weight ticket showing the number of pieces, type of merchandise and weight. Shipments received without this information will be delivered to exhibitor's booth without guarantee of piece count or condition. No liability will be assumed by Valley Expo & Displays for such shipments. The weight is rounded up the next one hundred pounds (100 lbs) and is taken from the inbound BOL and/or certified weight ticket. Separate shipments will not be combined. Shipments arriving without a specified weight on the BOL will be assigned and approximate weight by Valley. This weight will prevail.

### International Fuel Ethanol Workshop & Expo

CHI Health Center, August 24-26, 2020

All pieces must be labeled individually. After materials are packed, labeled and ready to be shipped, the completed Bill of Lading must be turned in at the Valley Service Desk. Do not leave this in your booth with your shipment. Call your designated carrier with pick-up information. In the event your carrier fails to show by carrier check in time indicated on the shipping information form, your shipment will be rerouted to Valley Expo & Displays' official show carrier at exhibitor's expense.

Tear

# SUPPLIED DIGITAL ART STANDARDS

**DISCOUNT PRICE DEADLINE:** August 2, 2020

# International Fuel Ethanol Workshop & Expo CHI Health Center, August 24-26, 2020

#### **Supplied Digital Art Standards**

In an effort to provide you with the best graphics for your display, Valley requests that you review these file and media requirements when you supply digital art. Supplying the proper files insures that your output will look the way you expect, and keep additional charges to a minimum. If you have questions about file formats, resolution, or other graphics concerns, please call us at 815-873-1500 or e-mail events@valleyexpodisplays.com

#### Raster (Pixel-based) Art -

Raster art is the way most continuous tone images are produced. Scanned images, Photoshop files, tif, jpg, & bmp are examples of raster or pixel-based art. Resolution for these files should be at least 300dpi at output size. For example, a file for 16 x 20 inch output should be 4800 pixels by 6000 pixels. Both cmyk and rgb are acceptable but cmyk is preferred. Its helpful if all your files are consistently one or the other. Use for:

Photographic or continuous tone images.

#### Vector Art -

Vector art is 'resolution independent', meaning it can be scaled to any size with no loss of quality. Illustrations created in Adobe Illustrator or Freehand are vector art. EPS files are the most common format for vector art.

NOTE: A Raster image imported or placed, and then saved in these programs is not changed into vector art...it is still a raster image and may not be suitable for some output options. Logos & illustrations produced as cut vinyl MUST be vector art. If you cannot supply vector art, you may be charged for the time required to convert/recreate your art in the proper format.

Cut vinyl, large format text, logos, graphic elements.

Art Size: Art files should be submitted with at least 0.5" bleed. (ex. 22" x 28" sign would be 22.5" x 28.5")

Raster Art can be supplied as Photoshop, jpg, tif, eps, bmp or other standard raster formats.

Vector Art should be Adobe Illustrator (.ai), InDesign (.indd) or .eps (from Illustrator or InDesign) files with text converted to paths. Include all linked files. If text is not converted to paths, all fonts must be included. When sending vector art use the package option in Illustrator or InDesign to properly export all necessary files.

QuarkExpress users, supply eps files with fonts embedded. Native Quark files are no longer supported.

**Media:** CD or DVD. For FTP access contact your Valley representative.

Please include a color hardcopy or pdf. Critical PMS colors should be indicated on the hardcopy.
